ULTIMATE QUAD LAYER NEOPRENE

SAIL
MARKET
ESPECIALISTAS EN VELA LIGERA

Zhik's unique quad layer wetsuit material has hydrophobic outer, superstretch insulation, titanium heat reflection and inner microfleece thermal. All glued and blind stitched for added waterproofness, and with a 3D panel cut for improved flexibility at both knees and elbows. Find the celebrated "loo rip" for easy access between races. The SuperWarm skiff suit combines with the SuperWarm top to build the ultimate cold water wetsuit.

MICRO FLEECE

WETSUIT RANGE

COOL - WARM
CONDITONS
SUPERSTRETCH
DURABLE

The celebrated series of Microfleece wetsuits come in a variety of styles from shorts to long john "skiff", in both mens and womens cut. These suits work in a wide range of weather conditions, as the inner layer operates to harness your body temperature. You are cooler on the hotter days and warmer on the colder days. You will also be surprised at how light and flexible the suit is. This suit will transform your thinking about what neoprene is about, designed for sailing above the waves, you have no choice but to race faster.

ISOTAK

**SUPERIOR
WATER PROOF
BREATHABLE**
BREATHES WITHOUT PORES

Made tougher to superior waterproof and breathable standards. Design focused on function with reduced bulk and weight. Suitable for ocean or bay.

Isotak uses modern materials to breath, with no pores that can become clogged like the older and less durable microporous textiles. Isotak breathes by inner absorption and diffusion.
